<https://docs.microsoft.com/en-us/microsoft-identity-manager/reference/version-history>

FIM 2010 Upgrade Paths

The minimal supported version that can be upgraded directly to MIM 2016 SP2 is FIM 2010 R2 SP1; v4.1.3419.0.

Support

Organizations should use software which is supported by the manufacturer, and therefore awareness of the end date of support, and planning for change is important:

- MIM 2016 SP2 is supported until the 09 January 2029.
<https://docs.microsoft.com/en-gb/lifecycle/products/microsoft-identity-manager-2016>
- FIM 2010 SP2 is supported until the 11th October 2022.
<https://docs.microsoft.com/en-gb/lifecycle/products/microsoft-forefront-identity-manager-2010-r2>
- AzureAD premium customers; specific Azure-related support is as per:
<https://docs.microsoft.com/en-us/microsoft-identity-manager/support-update-for-azure-active-directory-premium-customers>
- For those users still using SharePoint Server 2010 underneath the FIM Portal, support for this expired on 13th April 2021.
<https://docs.microsoft.com/en-gb/lifecycle/products/microsoft-sharepoint-server-2010>

- SharePoint Foundation 2013 support expires on the 11th April 2023.
<https://docs.microsoft.com/en-gb/lifecycle/products/sharepoint-foundation-2013>

Supported Platforms for MIM 2016

The underlying server, SQL and Sharepoint support is as follows:

<https://docs.microsoft.com/en-us/microsoft-identity-manager/microsoft-identity-manager-2016-supported-platforms>

Every organization has unique requirements and challenges, and one solution does not fit all. Innofactor offers a quick IAM Assessment approach, where we gather the requirements, analyze and propose the best solutions for your organization.

Our consultants have vast experience with different IAM products in the market and have successfully delivered IAM solutions in various industry verticals. We gather and evaluate the business requirements, assess the identity governance's current state, identify gaps and define a path forward by creating a road map.

After the assessment, we help you evaluate the product with POC, implementation, and managed services.
